Job Overview

Primary Water Solutions are experts in water hygiene risk management, including assessments, consultancy, and control. We work for a variety of public and private sector clients covering all aspects of Water Treatment, hygiene, and monitoring.

As Water Hygiene Technician, you will have previously worked in a trainee position or have experience as a water hygiene technician. You will have a sound knowledge of water systems and have ideally worked in a customer facing role previously. You will have a friendly flexible approach to your job and be confident in working as part of a team as well as independently.

The role will be responsible for conducting the following technical tasks, this list is not limited, your line manager may occasionally request that you work in another role which is reasonably within your capabilities and for which you have been trained.

Primary Water Solutions are a growing company who value their team. In return for your hard work and dedication we will offer you the opportunity to develop your career further, we will mentor, train and support you in order that you can grow with our business.

Tasks

- Temperature Monitoring, Sampling & Inspection of Hot and Cold-Water Systems
- Cleaning and Disinfection of Hot and Cold-Water Systems
- Servicing and Testing of Thermostatic Mixing Valves
- Clean and descale of shower heads
- CWST inspections

Key Responsibilities

- Carry out tasks allocated to you in accordance with PWS company procedures/method statements
- Adhering to all PWS Health and Safety procedures
- Reporting any risk to health identified onsite and report back to the PWS Account Manager
- At all times adhere to the clients specific Health and Safety/Safe Working practices.
- Ensure all equipment used is safe and fit for purpose
- Ensuring company vehicles are kept clean and tidy and equipment stored safely.
- Ensure all work is completed in compliance with current legislation and documented
- Complete onsite work activities as scheduled in your diary
- Complete allocated jobs within the agreed timescales.
- Complete all necessary documentation accurately and submit
- Completion of Technical Service Reports and submission on day of completion
- Organised with expenses and paperwork.
- Photographic evidence and clear labelling of assets where and when required
- Identifying onsite opportunities and report back to associated PWS Account Manager to action
