

Legionella Awareness Training

ON-LINE INTERACTIVE COURSE

Who should do the course:

The Legionella Awareness training course is essential for personnel who are involved in the implementation of a written scheme and who are responsible for maintaining site log books or undertaking tasks associated with cleaning, servicing, modification or repair of water systems. This includes line managers, process supervisors, trades persons, cleaners etc. It is particularly useful for those who have no previous training or those requiring a refresher. This half day online course covers the following:

Areas Covered:

- Background to Legionella & Legionnaires’ Disease
- The Causal Chain
- Hot & Cold Water Systems (types & system design)
- Operation & Inspection of Hot and Cold Water Systems
- Safe Management of Hot and Cold Systems
- How the law affects you – a breakdown of current regulations and guidance documents
- How to Prevent and Effectively Control Legionella to Safeguard your Organisation
